## Safety matters

to ensure your production at a high level

FBK have been manufacturing cleaning equipment since 1887. We are renowned globally for quality products that are focused on the food and beverage industries. Specializing to meet high standards in hygiene has enabled us to understand the need for our cleaning tools to be both effective and durable.

All our products are made in Denmark, have achieved maximum certification and meet all standard international requirements. Our design team are always ready to develop the right tools to achieve the best results for maximum hygiene and in support of efficient production and operator safety.

As a result we are recognized for innovative, ergonomic designs which complement quality, durability and operational efficiencies. To support our claim to have worldwide recognition, 95% of FBK's production is exported and sold through established professional distributors, who in turn support our commitment with their industry know-how in their own country.

FBK fabrica productos de limpieza desde 1887. Hoy en día, FBK está especializada y es mundialmente conocida en productos de limpieza higiénicos de alta calidad para las industrias de alimentos y bebidas, donde se requiere altos estándares de limpieza e higiene.

Para nosotros, se trata de desarrollar la herramienta adecuada para la limpieza higiénica que asegure su producción a un alto nivel y se adapte a quienes necesitan trabajar con ella. Tanto las industrias y los empleados necesitan los recursos adecuados. Todos nuestros productos se fabrican en Dinamarca y han obtenido las máximas certificaciones y cumplen con todos los requisitos internacionales estándar.

Nuestros productos son conocidos por su diseño único, innovador y ergonómico, que hacen que logren habilidades perfectas en términos de calidad, durabilidad, facilidad de uso y eficiencia. El 95% de los productos de FBK son exportados, vendidos y comercializados por nuestros distribuidores profesionales alrededor del mundo que tienen un gran conocimiento y experiencia en el país de operación.

FBK har fremstillet rengøringsudstyr siden 1887. Vi er kendt globalt for kvalitetsprodukter, der er fokuseret på fødevare og bryggeri industrien. Med speciale i at opfylde høje standarer inden for hygiejne har vi gjort det muligt for os at forstå behovet for, at vores rengøringsværktøjer er både effektive og holdbare.

Alle vores produkter er fremstillet i Danmark, har opnået maksimal certificering og opfylder alle internationale standardkrav. Vores designteam er altid klar til at udvikle de rigtige værktøjer til at opnå de bedste resultater for maksimal hygiejne og til støtte for effektiv produktion og operatør sikkerhed.

Som et resultat er vi anerkendt for innovative, ergonomiske design, der supplerer kvalitet, holdbarhed og driftseffektivitet. For at understøtte vores krav om verdensomspændende anerkendelse eksporteres og sælges 95 % af FBK's produktion gennem etablerede professionelle distributører, som igen støtter vores engagement i deres branchekendskab i deres eget land.

# Organize your business with a colour-coded system

With this colour system, food safety has never been so straightforward

At FBK our equipment and tools come with an EU Declaration of Compliance for food contact, appropriate documentation and technical specifications. Furthermore all raw materials are FDA approved.

Our equipment guarantees, that you have the best possible conditions to improve your food safety and maximize your control over cross contamination.

We provide a large colour range for our food handling tools, cleaning equipment and storage solutions - and with this range of colours you are ready to develop your unique system to accommodate all production. Your new system will ensure you are better prepared to meet GFSI/IFS/BRC/FSSC22000 standards and you have good food safety standards.

For more detailed information - [www.fbk.dk](http://www.fbk.dk)

## Organice su empresa con el sistema de código de colores

**Con este sistema de color, la seguridad alimentaria nunca ha sido más sencilla.**

En FBK, nuestros equipos y herramientas vienen con una Declaración de Cumplimiento de la UE para el contacto con alimentos, documentación y especificaciones técnicas adecuadas. Además, todos los materiales están aprobados por la FDA.

Nuestro equipo garantiza que tiene las mejores condiciones posibles para mejorar su seguridad alimentaria y maximizar su control sobre la contaminación cruzada.

Ofrecemos una amplia gama de colores para nuestras herramientas de manipulación de alimentos, equipos de limpieza y soluciones de almacenamiento, y con este sistema de codificación por color, está listo para desarrollar su propio sistema personal que se adapte a su producción. Su nuevo sistema garantizará que esté mejor preparado para cumplir con los estándares GFSI / IFS / BRC / FSSC22000 y que tenga buenos estándares de seguridad alimentaria.

## Organiser din virksomhed med et farvekodet system

**Med dette farvesystem har fødevaresikkerhed aldrig været så ligetil.**

Hos FBK leveres vores udstyr og værktøjer med en EU-erklæring om overholdelse af fødevarekontakt, relevant dokumentation og tekniske specifikationer. Desuden er alle materialer FDA-godkendte.

Vores udstyr garanterer, at du har de bedst mulige betingelser for at forbedre din fødevaresikkerhed og maksimere din kontrol over krydskontaminering.

Vi leverer et stort farvesortiment til vores værktøjer til håndtering af fødevarer, rengøringsudstyr, og med dette udvalg af farver er du klar til at udvikle dit unikke system, der passer til al produktion. Dit nye system vil sikre, at du er bedre forberedt på at opfylde GFSI/IFS/BRC/FSSC22000-standarer, og at du har gode standarder for fødevaresikkerhed.

## Global Goals / Objetivos Globales / Globale mål

Global goals are important to us at FBK and we take them very seriously. We carefully consider what is needed to facilitate sustainable and recyclable objectives at every point in our daily production process.

Los objetivos globales son importantes y en FBK nos los tomamos en serio. En nuestra mentalidad, pensamos en todo lo que hace posible implementar oportunidades sostenibles, de reciclaje y operativas en nuestras operaciones y trabajo cotidianos.

Globale mål er vigtige for os hos FBK, og vi tager dem meget alvorligt. Vi overvejer nøje, hvad der er nødvendigt for at fremme bæredygtige og genanvendelige mål på alle niveauer i vores daglige produktionsproces.

# The Hygiene Cleaning System!

## Extrusions for all brush bodies, shovels, buckets etc.

FBK manufactures from colour coded virgin polypropylene injected under very high pressure to produce solid, strong mouldings. This production technique sets FBK products apart from foamed injection methods.

## Brush filaments

The majority of brushware is filled using polyester. PBT filaments of various lengths and thicknesses to suit the application. This material is extremely suitable for autoclaving to +120°C / +248°F, does not absorb water, and is therefore ideal in retaining bristle stiffness and bend recovery. It wears longer and withstands destruction from a wide range of caustic cleaning chemicals. Filament retention is important to FBK and the combination of precision drilled high density brush blocks and insertion of stainless steel retaining clips achieves this objective whilst allowing for the penetration of anti-bacterial agents to reach deep into the bristle clumps.

## Inyección para todos los cuerpos de los cepillos, palas, cubetas, etc.

FBK fabrica sus productos con polipropileno virgen coloreado inyectado a muy alta presión para producir piezas sólidas y muy resistentes. Esta técnica de producción coloca a los productos de FBK por encima de los métodos estándar de inyección que facilitan el rompimiento de los cepillos al generarse burbujas al interior.

## Cerdas de los cepillos

La mayoría de los cepillos se fabrica con cerdas de poliéster PBT de diferentes longitudes y grosor para adaptarse a diversas aplicaciones. Este material es extremadamente conveniente para soportar temperaturas de desinfección (+120°C/+248°F), no absorbe agua, por lo tanto es ideal en la conservación de la rigidez y la recuperación del doblado de las cerdas. Dura más tiempo y resiste la acción corrosiva de químicos de limpieza tanto ácidos como alcalinos. Evitar la pérdida de cerdas es una tarea primordial para FBK. La combinación del perforado de precisión de cada uno de los bloques junto con la inserción de grapas de acero inoxidable logra este objetivo y al mismo tiempo permite la penetración de agentes antibacterianos para alcanzar hasta lo más profundo de los cúmulos de cerdas.

## Generelt for alle børster, skovle, spande mm.

Børstekroppene produceres i fuldstøbt jomfrueligt polypropylen, der sprøjtestøbes i rustfri stålform under meget højt tryk, hvilket resultere i en fuldstøbt kompakt børstekrop med en glat smudsafvisende overflade. Produktionsteknikken adskiller sig fra den traditionelle produktionsmetode hvor børstekroppe støbes i aluminiums forme under mindre tryk, som resultere i opskummet børstekroppe som er fyldt med indvendige lufthuller og ru overflade.

## Børste filamenter

I langt hovedparten af vores produkter, bruges Polyester PBT filamenter af forskellige længder og tykkelser. Polyester PBT er varmebestandigt til +120°C/+248°F, tåler autoklavering, absorberer ikke vand og har derfor samme stivhed i våd som tør tilstand, desuden har den en rigtig god genopretningsevne. Filamenterne holder længere end traditionelle filamenter, og tåler en meget bred vifte af rengøringskemikalier m.m. Kvaliteten af filamenterne er naturligvis vigtig for os, og i kombinationen af præcis boring, nøjagtig isætnings af filamenterne som fastholdes af rustfri stål krämper, resulterer det i en ekstrem holdbarhed og modvirker at filamenterne falder ud af børstekroppen.

## Colour code

Código de color / Farvekoder

- 1** XXXX-1 = White / Blanco / Hvid
- 2** XXXX-2 = Blue / Azul / Blå
- 3** XXXX-3 = Red / Rojo / Rød

|----------|-----------|------------------|------|------|----------|---------|
| 15123    | 250 x 120 | Nylon Poliestere | (12) | 100° |          |         |
| 15121    | 250 x 120 | Nylon Poliestere | (12) | 100° |          |         |
| 15124    | 250 x 120 | Nylon            | (12) | 100° |          |         |
| 15122    | 250 x 120 | Nylon            | (12) | 100° |          |         |
| 15125    | 250 x 120 | Nylon            | (12) | 100° |          |         |

Very soft / Muy suave / Meget blød

Soft / Suave / Blød

Medium / Medio / Medium

Stiff / Duro / Stiv

Very stiff / Muy duro / Meget stiv

Operating temp. / Temperatura de operación / Brugstemp.

# One-piece squeegees

No.1 for  
removal of  
liquid and  
soft waste!

One-piece  
ergonomic  
handles  
**See page 47**

### One-Piece Squeegees

Haraganes de una pieza super higiénicos  
Fuldstøtte gulvskrabere

Extremely effective action when both pushing or pulling.  
Moves liquids and condensation effortlessly from smooth surfaces.

Extremadamente efectivo tanto para adelante como para atrás. Elimina el agua de superficies lisas sin esfuerzo junto con la condensación.

Meget effektivt og hygiejnisk gulvskraber. Fjerner effektivt vand og kondens.

### One-piece squeegees

Jaladores de una pieza, súper higiénicos / Fuldstøtte gulvskrabere

# Squeegees with double rubber blade

i

28556-  
360° pivot  
Eje de 360°  
360° drejeled

28556

28456

28653

## Squeegees with pivot

Jaladores con cuello giratorio / Gulvskrabere med drejeled

| ITEM nr. | SIZE (mm) | DETAILS                                 | PACK | C°      | FEATURES | COLOURS   |
|----------|-----------|---|------|---------|----------|-----------|
| 28453-   | 400 mm    | White rubber / Goma blanca / Hvid gummi | (6)  | 50° 80° | ●        | 1 2 3 4 5 |
| 28553-   | 500 mm    | White rubber / Goma blanca / Hvid gummi | (6)  | 50° 80° | ●        | 1 2 3 4 5 |
| 28653-   | 600 mm    | White rubber / Goma blanca / Hvid gummi | (6)  | 50° 80° | ●        | 1 2 3 4 5 |
| 28456-   | 400 mm    | Black rubber / Goma negra / Sort gummi  | (6)  | 50° 80° | ●        | 1 2 3 4 5 |
| 28556-   | 500 mm    | Black rubber / Goma negra / Sort gummi  | (6)  | 50° 80° | ●        | 1 2 3 4 5 |
| 28656-   | 600 mm    | Black rubber / Goma negra / Sort gummi  | (6)  | 50° 80° | ●        | 1 2 3 4 5 |

Operating temp. / Temperatura de operación / Brugstemp.

Sterilisation temp. / Temperatura de esterilización / Sterilisationstemp.

PHB approved / PHB aprobado / PHB godkendt

i

**28603-**  
**Double rubber lip**  
Doble goma  
Dobbelt gummiblade

Double rubber squeegee with  
replaceable cartridge.  
Jalador con goma reemplazable.  
Dobbelt udskiftelige gummiblade.

## Squeegees / Jaladores / Gulvskrabere

| ITEM nr. | SIZE (mm) | DETAILS                                 | PACK | C°         | FEATURES | COLOURS         |

# Condensation squeegee, bottle and hose

## Condensation squeegee:

- 420mm working width
- Hygienic design
- Easy to clean, no hidden corners
- Flexible rubber lip to match both flat and curved surfaces, tubes
- Food approved contact

## Jalador de condensación:

- 420mm de ancho
- Diseño higiénico
- Fácil de limpiar, sin recovecos
- Filo de goma flexible para funcionar en superficies planas, curvas o tubos
- Apto para contacto con alimentos

## Kondensskraber:

- Hygiejnisisk design
- Fødevarer godkendt
- Let at rengøre, ingen skjulte hjørner
- 420 mm
- Designet til både flade og kurvede overflader
- Fleksibelt gummi

**21306-**  
**PP filaments**  
Cerdas de PP  
PP filamenter

This filament has good abrasion resistance and excellent chemical resistance to both acids and alkali solutions. It has an inferior bend recovery to Polyester.

Esta cerda tiene buena resistencia a la abrasión y excelente resistencia a los químicos, tanto a soluciones ácidas como alcalinas. Tiene una recuperación de curvatura inferior al Poliéster.

Filamenter af polypropylene er slidstærke og har fremragende kemiske resistente egenskaber over for både syre og base løsninger. Sammenlignet med polyester er fleksibiliteten lavere.

### Sweepers with flagged polypropylene filaments

# Lobby and dust pan with lid/grip

## Lobby pan & dust pan with lid/grip:

- Strong heavy duty design
- Capacity for 7 Ltr.
- Hygienic and easy to clean
- Fits to FBK wall holder system
- Can hang upside down for drying
- 1050 mm incl. handle
- Dustpan with lid/handgrip are designed with holder for either bannister brush or hand squeegee

## Recogedor con mango y tapa y recogedor de mano con tapa y asa:

- Diseño extra fuerte
- Capacidad para 7 litros
- Higiénico y fácil de limpiar
- Encaja con el sistema organizador de FBK
- Puede colgarse boca abajo para secarse
- Mide 1050 mm incluyendo el mango
- Recogedor con tapa/asa diseñado para sostener el cepillo panadero o el jalador de mano

## Fejebakke til skaft & med håndtag:

- Kraftig og stabilt design
- Kapacitet på 7 L.
- Hygiejnisk - let at rengøre
- Passer til FBK ophængssystem
- Integrerer ophængsfunktion
- 1050 mm inkl. skaft
- Fejebakken med låg/håndtag er designet med en holder til enten håndkost eller håndskraber.

## Lobby pan without handle

Recogedor para ajustar a mango / Fejebakke uden skaft

# Bucket & lid

The smartest  
bucket available!

#### Functional, ergonomic and very hygienic:

- 15 and 9 Ltr. capacity. Inside graduations in Litres and UK/US Gallons
- Molded in food grade polypropylene
- Special designed pouring lip, heavy duty rim and storage function
- Hand-grip on back of bucket for easy pouring - big enough for gloved hands and high enough off floor to avoid scraping knuckles
- Strong, comfortable polypropylene handle
- Easy to clean – smooth surfaces, no internal or external sharp angles

#### Funcional, ergonómica y muy higiénica:

- Gran capacidad de 15 L y 9 L. Con graduaciones en litros y galones al interior
- Fabricado en polipropileno de alto impacto, grado alimentario
- Con boquilla especialmente diseñada para verter, y función de almacenaje
- Agarradera en la parte trasera de la cubeta para un vertido fácil-lo suficientemente alta para evitar rasparse los nudillos de la mano
- Asa de polipropileno fuerte y confortable
- Fácil de limpiar, sin ángulos internos ni externos

#### Funktionel, ergonomisk og top hygiejinsk:

- 15 og 9 L volumen. Indvendig mål i Liter og UK/US Gallon. Produceret i FDA godkendt materiale
- Speciel designet hældekant, robustkant og ophængsfunktion
- Ekstra håndtag nederst på spanden gør det muligt at få fat uden at skrabe knoerne
- Bekvemmelig og stærk hank i polypropylene
- Unikt hygiejinsk design – let rengørlig uden skarpe kanter

# Detectable range

A range of sweepers and hand brushes where both brush bloc and filaments are fully detectable.

Una gama de escobas y cepillos de mano donde tanto el bloque del cepillo como las cerdas son totalmente detectables.

Sortiment af fejekoste og håndbørster hvor både krop og filamenter er detekterbare.

A range of one-piece molded articles as: Spatulas, scrubber with rubber, bucket, hand-scoops, shovels and dustpan.

Una gama de artículos moldeados en una sola pieza, como espátulas, cepillos flexibles, cubetas, cucharones, palas y recogedores.

Sortiment af fuldstøbte produkter: Spartler, skabere med gummi, spande, håndskovle, skovle og fejebakker.

A range of sweepers and handbrushes which only the filaments are detectable, not the brush bloc.

Una gama de escobas y cepillos de mano en los que el bloque del cepillo no es detectable, pero sí las cerdas.

Sortiment af fejekoste og håndbørster hvor kun filamenter er detekterbare.

## **FBK has two detectable options**

- A fully detectable range, where the complete item is detectable. This is for industries that want to ensure that production achieves a secure process at an extra high level.
- A range where only the filaments are detectable

## **Detectable products to prevent serious consequences**

- Food safety requirements are more demanding than ever and certain standards, (e.g. BRC) require detectable products to be used in food and beverage production as mandatory. Poor product management and subsequent lax controls can have serious consequences. Financial losses and recalls due to foreign objects in finished product can create bad publicity and position your brand as unprofessional and unreliable.

## **Detectable product testing (see page 66)**

- We have tested various block and rubber pieces from several detectable products in various sizes and brushware filaments. The various block and rubber pieces are from fully moulded handle, dough scraper and squeegees with detectable rubber.
- The detectability test is checked on the LOMA SYSTEMS detector model IQ3ST, with different settings - frequency, angle phase and threshold. Size of the inspection window 350 x 750mm repeats on all products.
- In all tests, detectable samples are placed inside different brand product packages to achieve the most realistic result.
- Detectable product manufacturing is a complicated process. The composition of the materials that make the product detectable can make filaments less flexible. Rubber and full moulded items can become fragile over time.

*Please note: FBK is not responsible for any test or production/machine failures.*

## **FBK tiene dos opciones detectables**

- Una gama totalmente detectable, donde todo el artículo es detectable. Esta opción es para industrias que desean garantizar un alto nivel de seguridad en su producción
- Una gama donde sólo las cerdas son detectables

## **Los productos detectables pueden prevenir consecuencias catastróficas**

- Los requerimientos de seguridad alimentaria son más estrictos que nunca, con mas estándares (ej. BRC) que requieren el uso de productos detectables en la producción de alimentos y bebidas como un requerimiento obligatorio. Un pobre manejo y posterior mal control puede tener enormes consecuencias. Pérdidas financieras debido a objetos extraños crearán mala publicidad y posicionará tu marca como poco profesional y no confiable.

## **Pruebas de productos detectables (ver página 66)**

- Pruebas de detectabilidad de los cepillos FBK con filamentos 0.35mm/0,60 mm, raspadores y jaladores con goma detectable.
- Toda detectabilidad es revisada en el detector LOMA SYSTEMS, modelo IQ3ST, con diferentes ajustes. Frecuencia, ángulo, pase y umbral. El tamaño de la ventana de inspección es de 350 x 700 mm se repite en todos nuestros productos.
- Durante las pruebas, todos los contaminantes fueron puestos dentro del paquete junto con el producto, en varias posiciones.
- Por favor note que FBK sólo es responsable de sus propias pruebas.
- La manufactura de productos detectables es un proceso complicado. La composición de materiales que hacen al producto detectable puede hacer que los filamentos no sean tan flexibles. La goma y los artículos completamente amoldados pueden volverse frágiles con el tiempo.

*Por favor considere: FBK no es responsable por ninguna prueba o producción/máquina fallida*

## **FBK har to detekterbare sortimenter**

- Et fuldt detekterbar sortiment, hvor hele produktet kan detekteres. Dette er for industrier, der ønsker et sikre, at produktionen opnår en sikker proces på ekstra et højt niveau.
- Et detekterbar sortiment, hvor kun filamenterne er detekterbare.

## **Detekterbare produkter kan forhindre alvorlige konsekvenser**

- Kravene til fødevaresikkerhed er mere krævende end nogensinde, og visse standarder (e.g. BRC) kræver obligatorisk detekterbare produkter i fødevare- og bryggeri industrien. Dårlig produktstyring og efterfølgende kvalitets kontrol kan få alvorlige konsekvenser. Tilbagekaldelser af produkter på grund af fundne uidentificerede genstande kan have store finansielle omkostninger og samtidig positionere et firma/brand som uprofessionelt og upålideligt.

## **Test af detekterbare produkter (se side 66)**

- Vi har testet forskellige blok- og gummistykker fra flere detekterbare produkter i forskellige størrelser samt børste filamenter. De forskellige blok- og gummistykker er fra fuldstøbt skaft, dejskraber og skrabere med detekterbar gummi.
- Detekterings tests er lavet på LOMA SYSTEMS-detektormodellen IQ3ST med forskellige indstillinger - frekvens, vinkelfase og afgrænsning. Størrelsen af inspektionsvinduet 350x750mm og gentages på alle produkter.
- I alle tests placeres detekterbar prøver indeni forskellige mærkevare pakker for at opnå det mest realistiske resultat.
- Detekterbar produktfremstilling er en kompliceret proces. Sammensætningen af de materialer, der gør produktet detekterbar, gør filamenter mindre fleksible. Gummi og fuldstøbte emner kan blive skræbelige over tid.

*Bemærk: FBK er ikke ansvarlig for test- eller produktions-/maskinfelj.*

# There is no guarantee

of zero risk with any detectable products  
– unfortunately!

## **Manufacturing detectable product requires extreme care in process**

Moulded detectable articles contain precise proportions of metallic trace material throughout. The aim is to achieve a uniform distribution to form a homogenous distribution of particle size and presence throughout the entire polymer mix prior to moulding.

When any fragment broken from a detectable article passes through metal detection equipment there will always be the possibility that the metal content in this piece is smaller than the machinery is adjusted to detect, or its orientation is such that it appears to be even smaller. In these circumstances there is a risk that these small particle sizes will pass through undetected.

## **Regular calibration of metal detecting equipment is highly important**

Even where detectors are installed with high specifications and assumed capable of fail-safe detection it cannot be taken as a guarantee when considering the variables encountered !

For example:

- Type of food or other product
- Orientation and speed of presentation
- Settings selected following replicated testing
- Packaging and pack size
- Serviceability and sensitivity of equipment

We recommend that regular testing is undertaken using samples and conditions that simulate those used in typical metal detection throughput. It is helpful to keep records derived from all detection events recording settings at the time of detection, material detected (ferrous, non-ferrous or stainless steel), actual particle size of piece detected and whether medium was wet or dry.

It is important not to assume that because a detector was able to detect a ferrous object on its own, that the same size of material encased in polymer would be identified at the same settings. Likewise because the equipment reacts to a particular 'foreign' object, that any smaller sized particle of the same material would also trigger the same response.

**Please note it is the responsibility of the operator to check all response settings as FBK cannot be held responsible for machine or operator errors.**

## No hay garantía

de cero riesgo con cualquier producto detectable - ¡desafortunadamente!

### **La fabricación de productos detectables requiere un cuidado extremo en el proceso**

Los artículos detectables moldeados contienen proporciones precisas de material metálico en toda su extensión. El objetivo es conseguir una distribución uniforme para formar una distribución homogénea del tamaño y la presencia de las partículas en toda la mezcla de polímeros antes del moldeo.

Cuando cualquier fragmento roto de un artículo detectable pasa a través del equipo de detección de metales, siempre existirá la posibilidad de que el contenido metálico en esta pieza sea más pequeño de lo que la maquinaria está ajustada para detectar, o su orientación es tal que parece ser aún más pequeño. En estas circunstancias, existe el riesgo de que estas partículas de pequeño tamaño pasen sin ser detectadas.

### **La calibración periódica de los equipos de detección de metales es muy importante**

Incluso cuando los detectores se instalan con altas especificaciones y se supone que son capaces de una detección a prueba de fallos, esto no puede tomarse como una garantía si se tienen en cuenta distintas variables.

Por ejemplo:

- Tipo de alimento u otro producto
- Orientación y velocidad de presentación
- Ajustes seleccionados tras la realización de pruebas
- Embalaje y tamaño del envase
- Capacidad de servicio y sensibilidad del equipo

Recomendamos que se realicen pruebas periódicas, utilizando muestras y condiciones que simulan las que se utilizan en el rendimiento típico de la detección de metales. Es útil mantener registros derivados de todos los eventos de detección que registren los ajustes en el momento de la detección, el material detectado (ferroso, no ferroso o acero inoxidable), el tamaño real de las partículas de la pieza detectada y si el medio estaba húmedo o seco.

Es importante no suponer que porque un detector haya sido capaz de detectar un objeto ferroso por sí mismo, el mismo tamaño de material envuelto en polímero se identificaría con los mismos ajustes. Del mismo modo, porque el equipo reacciona a un objeto "extraño" concreto, que cualquier partícula de menor tamaño del mismo material también provocaría la misma respuesta.

**Tenga en cuenta que es responsabilidad del operador comprobar todos los ajustes de respuesta, ya que FBK no se hace responsable de los errores de la máquina o del operador.**

## Der er ingen garanti

for nul risiko med nogen detekterbare produkter - desværre!

### **Fremstilling af påviselige produkter kræver ekstrem omhu i processen**

Støbte påviselige genstande indeholder præcise proportioner af metallisk spormateriale overalt. Målet er at opnå en ensartet fordeling for at danne en homogen fordeling af partikelstørrelse og tilstedeværelse i hele polymerblandingen inden støbning.

Når et fragment, der er brudt fra en påviselig artikel, passerer gennem metaldetekteringsudstyr, vil der altid være mulighed for, at metalindholdet i dette stykke er mindre, end maskinen er justeret til at registrere, eller dens retning er sådan, at den ser ud til at være endnu mindre. Under disse omstændigheder er der risiko for, at disse små partikelstørrelser vil passere gennem uden registrering.

### **Regelmæssig kalibrering af metaldetekteringsudstyr er meget vigtig**

Selv hvor detektorer er installeret med høje specifikationer og antages i stand til fejlsikker detektion, kan det ikke tages som en garanti, når man overvejer de variabler, der opstår!

F.eks.:

- Type fødevarer eller andre produkter
- Præsentationsretning og -hastighed
- Indstillinger valgt efter gentagne test
- Emballage og pakkestørrelse
- Udstyrs brugbarhed og følsomhed

Vi anbefaler, at der udføres regelmæssige test ved hjælp af prøver og forhold, der simulerer dem, der anvendes i typisk metaldetekteringsoverførsels-hastighed. Det er nyttigt at føre optegnelser, der stammer fra alle registreringshændelser, registrering-sindstillinger på detektionstidspunktet, materiale, der opdages (jernholdigt, ikke-jernholdigt eller rustfrit stål), den faktiske partikelstørrelse af detekteret stykke, og om objektet var vådt eller tørt.

Det er vigtigt ikke at antage, at fordi en detektor var i stand til at opdage et jernholdigt objekt alene, ville den samme størrelse materiale indkapslet i polymer blive identificeret ved de samme indstillinger. Ligeledes fordi udstyret reagerer på et bestemt "fremmed" objekt, at enhver mindre partikel af samme materiale også ville udløse den samme reaktion.

**Bemærk, at det er operatørens ansvar at kontrollere alle svarindstillinger, da FBK ikke kan holdes ansvarlig for maskin- eller operatørfejl.**

# Resin-Set range

## An extra security when it comes to food safety

Each filament bundle is assembled and inserted mechanically into the brush block, along with a retaining stainless steel cramp and the pressed with considerable force firmly into place. Resin is then injected onto the surface and around the filaments to form a seal.

### What is Resin-Set?

The Resin-Set articles are made by a two-component molding system, manufactured by FBK Denmark. We recommend usage temperatures from -10 C to 120 C, and autoclavable at temperatures up to 134 C°.

### Gama de resina

La gama de resina es una selección de artículos con cerdas colocadas en una base de resina flexible, hecho con una técnica única en la elaboración de los cuerpos de los cepillos. Las cerdas son aseguradas tanto con grapas de acero inoxidable como con resina, lo que rodea cada bloque de cerdas para un mejor sellado.

### Resin-Set

Resin-Set er et sortiment af børster, hvor filamenteerne bliver limet fast til børstekroppen med en unik teknik i speciel fremstillet emner. Filamenteerne er sikret med både rustri stål krampe + lim som flyder omkring og ned i hver borehul, hvilket sikrer enkelte filamenter ikke kan trækkes løs, samt minimere risikoen for bakterier i borehullerne.

# Water gun and coupler

## What is Waterfeed?

Waterfed hygiene brushes are designed for professional use where additional an integrated flow of clean water is clearly advantageous, or even necessary, for best results. The range of waterfed articles are often used by professionals for avoiding potential abrasions to fine surfaces, and providing a superior finish.

## Waterfeed

A special designed range of articles, where water comes out from each filament bundle. This provides a constant flow of water to the working area/spot. Our range of waterfeed articles are: deck scrubs, handles, churn brushes, waterguns with couplers/hose and washing brushes.

## Con paso de agua

Los cepillos higiénicos con paso de agua están especialmente diseñados para el uso profesional, donde la limpieza a través del agua es una clara ventaja o una necesidad para mejores resultados. La gama de los artículos con paso de agua son frecuentemente usados por profesionales para evitar posibles abrasiones a superficies frágiles.

## Vandgennemløb

Hygiene børster med vandgennemløb er specielt designet til professionelt brug, hvor vandtilførsel er en klar fordel eller en nødvendighed for det bedste resultat. Vandgennemløbssortimentet bruges ofte til afvaskning eller til rengøring på fine og følsome overflader, og giver et overlegen resultat.

# Why choose FBK?

FBK aims to develop articles that are not only fit for purpose, but also ergonomic and user-friendly.

Our design team will always consider quality, design, and productivity as well as how best results are achieved in relation to consumer expectations.

In consideration for the requirements of the industry, articles are available with temperature tolerance from -20°C/-4°F to +134°C/273°F.

Focus on the food and beverage industry

Professional dealers

Huge know-how in cleaning tools for food and beverage industry

Certified food contact approved

Choose from more than +3000 different products

The products are designed to work together and make sense

Innovative with focus on the user's well-being

Distributor network in +80 countries

Meets BRC Global, FDA, IFS standards and EU compliant

Produced and developed in Denmark and have 130 years of experience

Large colour coding program

## ¿Por qué escoger FBK?

FBK busca desarrollar artículos que no sólo cumplan con su propósito, pero que también sean ergonómicos y amigables con el usuario. Nuestro equipo de diseño siempre considerará lo que obtenga mejores resultados y sea menos cansado. En consideración con los requerimientos de la industria, nuestros artículos están disponibles con tolerancia de temperatura de -30°C/-22°F a +134°C/273°F.

- Producidos y desarrollados en Dinamarca, con 130 años de experiencia
- Un extenso programa de código de color
- Los productos están diseñados para trabajar conjuntamente y ser intuitivos
- Innovadores con un enfoque en el bienestar del usuario.
- Escoger entre más de 3000 productos diferentes
- Aprobado y certificado para el contacto con los alimentos
- Immenso conocimiento en las herramientas de limpieza para la industria alimentaria y de bebidas
- Distribuidores profesionales
- Enfoque en la industria de los alimentos y bebidas
- Red de distribuidores en +80 países
- Cumple con las disposiciones de BRC Global, IFS y FDA-UE

## Hvorfor vælge FBK?

FBK har til formål at udvikle artikler, der ikke kun er egnede til formålet, men også ergonomiske og brugervenlige. Vores designteam vil altid overveje kvalitet, design og produktivitet samt hvordan de bedste resultater opnås i forhold til forbrugernes forventninger. Under hensyntagen til industriens krav fås artikler med temperaturtolerance fra -20°C/-4°F til +134°C/273°F.

- Produceret og udviklet i Danmark og har 130 års erfaring
- Stort farvekodningsprogram
- Produkterne er designet til at arbejde sammen og give mening
- Innovativ med fokus på brugerens velbefindende
- Vælg mellem mere end +3000 forskellige produkter
- Certificeret fødevarekontakt godkendt
- Kæmpe knowhow inden for rengøringsværktøjer til fødevare- og bryggeriindustrien
- Professionelle forhandlere
- Primær fokus på fødevare- og bryggeriindustrien
- Distributørnetværk i +80 lande
- Opfylder BRC Global - IFS standarder og FDA - EU deklarationer

### Generally:

PBT – pH 1-7 resistant to acids  
 PP – pH 1-14 resistant to both acids and alkalines  
 Depending on concentration and time in contact.

### General:

PBT – pH 1-7 resistente a los ácidos  
 PP – pH 1-14 resistente tanto a ácidos como bases  
 Dependiendo de la concentración y al tiempo de contacto.

### Generelt:

PBT – pH 1-7 resistent over for syrer  
 PP – pH 1-14 resistent over for både syre og baser  
 Afhængig af koncentration og tiden med kontakt.

\*\*\* = Excellent; no deterioration or long-term adverse effects.

\*\* = Caution; variations in concentration, temperature and exposure could be detrimental.

\* = Unsatisfactory; contact will result in permanent deterioration.

**Notes:** The Information provided assumes temperatures not exceeding 20° Celsius Concentration % relates to % chemical substance in total mix with water. Information is based on data provided by suppliers of our raw materials, who state: "we believe it to be true and accurate, but no warranties are expressed or implied regarding its accuracy or the performance of any product. Testing is recommended for critical applications".

\*\*\* = Excelente; no deteriorio ni efectos adversos a largo plazo.

\*\* = Precaución; variaciones en concentración, temperatura y exposición podrían ser perjudiciales.

\* = Insatisfactorio; el contacto podría resultar en deterioro permanente

**Notas:** La información suministrada asume temperaturas que no excedan los 20 grados Celsius. La concentración en porcentaje se refiere al % de la sustancia química mezclada en total con agua. La información es basada en los datos proporcionados por los proveedores de nuestras materias primas, quienes manifiestan: "creemos que es verdad y preciso, pero no hay garantías expresadas o implícitas en cuanto a la precisión o funcionamiento de cualquier producto". Se recomienda hacer pruebas para aplicaciones críticas.

\*\*\* = Fremragende; ingen forringelse eller længerevarende bivirkninger

\*\* = Forsiktig; variationer i koncentrationen, temperatur og udsmættelse kan være skadelig.

\* = Utilfredsstillende; kontakt vil resultere i permanent forringelse

**Note:** Oplysningerne forudsætter at temperaturer ikke overstiger 20°C. Koncentration i % er baseret på % kemisk substans blandet med vand. Oplysningerne er baseret på data fra råvare leverandøren, der angiver: "Vi mener at oplyste informationer er sande og korrekte, men vi kan ikke stille garantier, hvilket er et udtrykt for informationens nøjagtighed ved brugen af det enkelte produkt". Det anbefales at teste produktet ved kritiske anvendelse.
